TRACEABLE.

Traceable Is Committed to Fair, Industry-Standard Contracting

FREQUENTLY ASKED QUESTIONS

At Traceable, we are committed to providing a seamless, transparent, and efficient contracting process. Our Master Subscription Agreement has been developed from decades of experience with an eye to transacting quickly and fairly. They reflect terms that have become standard for SaaS agreements—streamlined, customer-friendly, and trusted by industry leaders.

Don't Want to Use Our MSA? OK! Let's Use the AWS Standard Contract or Bonterms

- **Industry-Standard Contracts:** The AWS Standard Contract and Bonterms Online Cloud Terms are trusted by Fortune 500 and Global 2000 companies for SaaS transactions.
- **Meets Customers' Needs:** Designed to meet the core needs of each party, with simple customization.

Why Standard Terms Work for You

Saves Time and Costs
By using the Traceable MSA, the AWS Standard Contract, or Bonterms Online Cloud Terms, we reduce the time spent negotiating legal terms and eliminate the need for lengthy reviews of proprietary agreements—so we can deliver value to you faster.

Fair and Balanced
These contracting vehicles are developed by leading legal experts to ensure fairness and balance for both parties. They are transparent, predictable, and free of surprises.

Next steps

Review the Traceable Master Subscription Agreement here: www.traceable.ai/enterprise/msa. Or tell your Traceable rep that you want to use either of the following:

- Bonterms Online Cloud Terms, with Traceable's Provider-Specific Terms, here: www.traceable.ai/legal/traceable-bonterms-cloud-terms
- AWS Standard Contract, with Traceable-specific modifications, here: www.traceable.ai/legal/traceable-aws-standard-contract

Together, let's build a partnership that focuses on results — not red tape.

About Traceable

Traceable is the industry's leading API security company helping organizations achieve API protection in a cloud- first, API-driven world. Traceable is the only contextually-informed solution that powers complete API security – API discovery and posture management, API security testing, attack detection and threat hunting, and attack protection anywhere your APIs live. Traceable enables organizations to minimize risk and maximize the value that APIs bring to their customers. To learn more about how API security can help your business, visit https://www.traceable.ai/.
